

asian-led-global / country occurrences

312 confirmed works / 83 with actor country associations / 11 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Zero-occurrence boundary countries omitted.

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

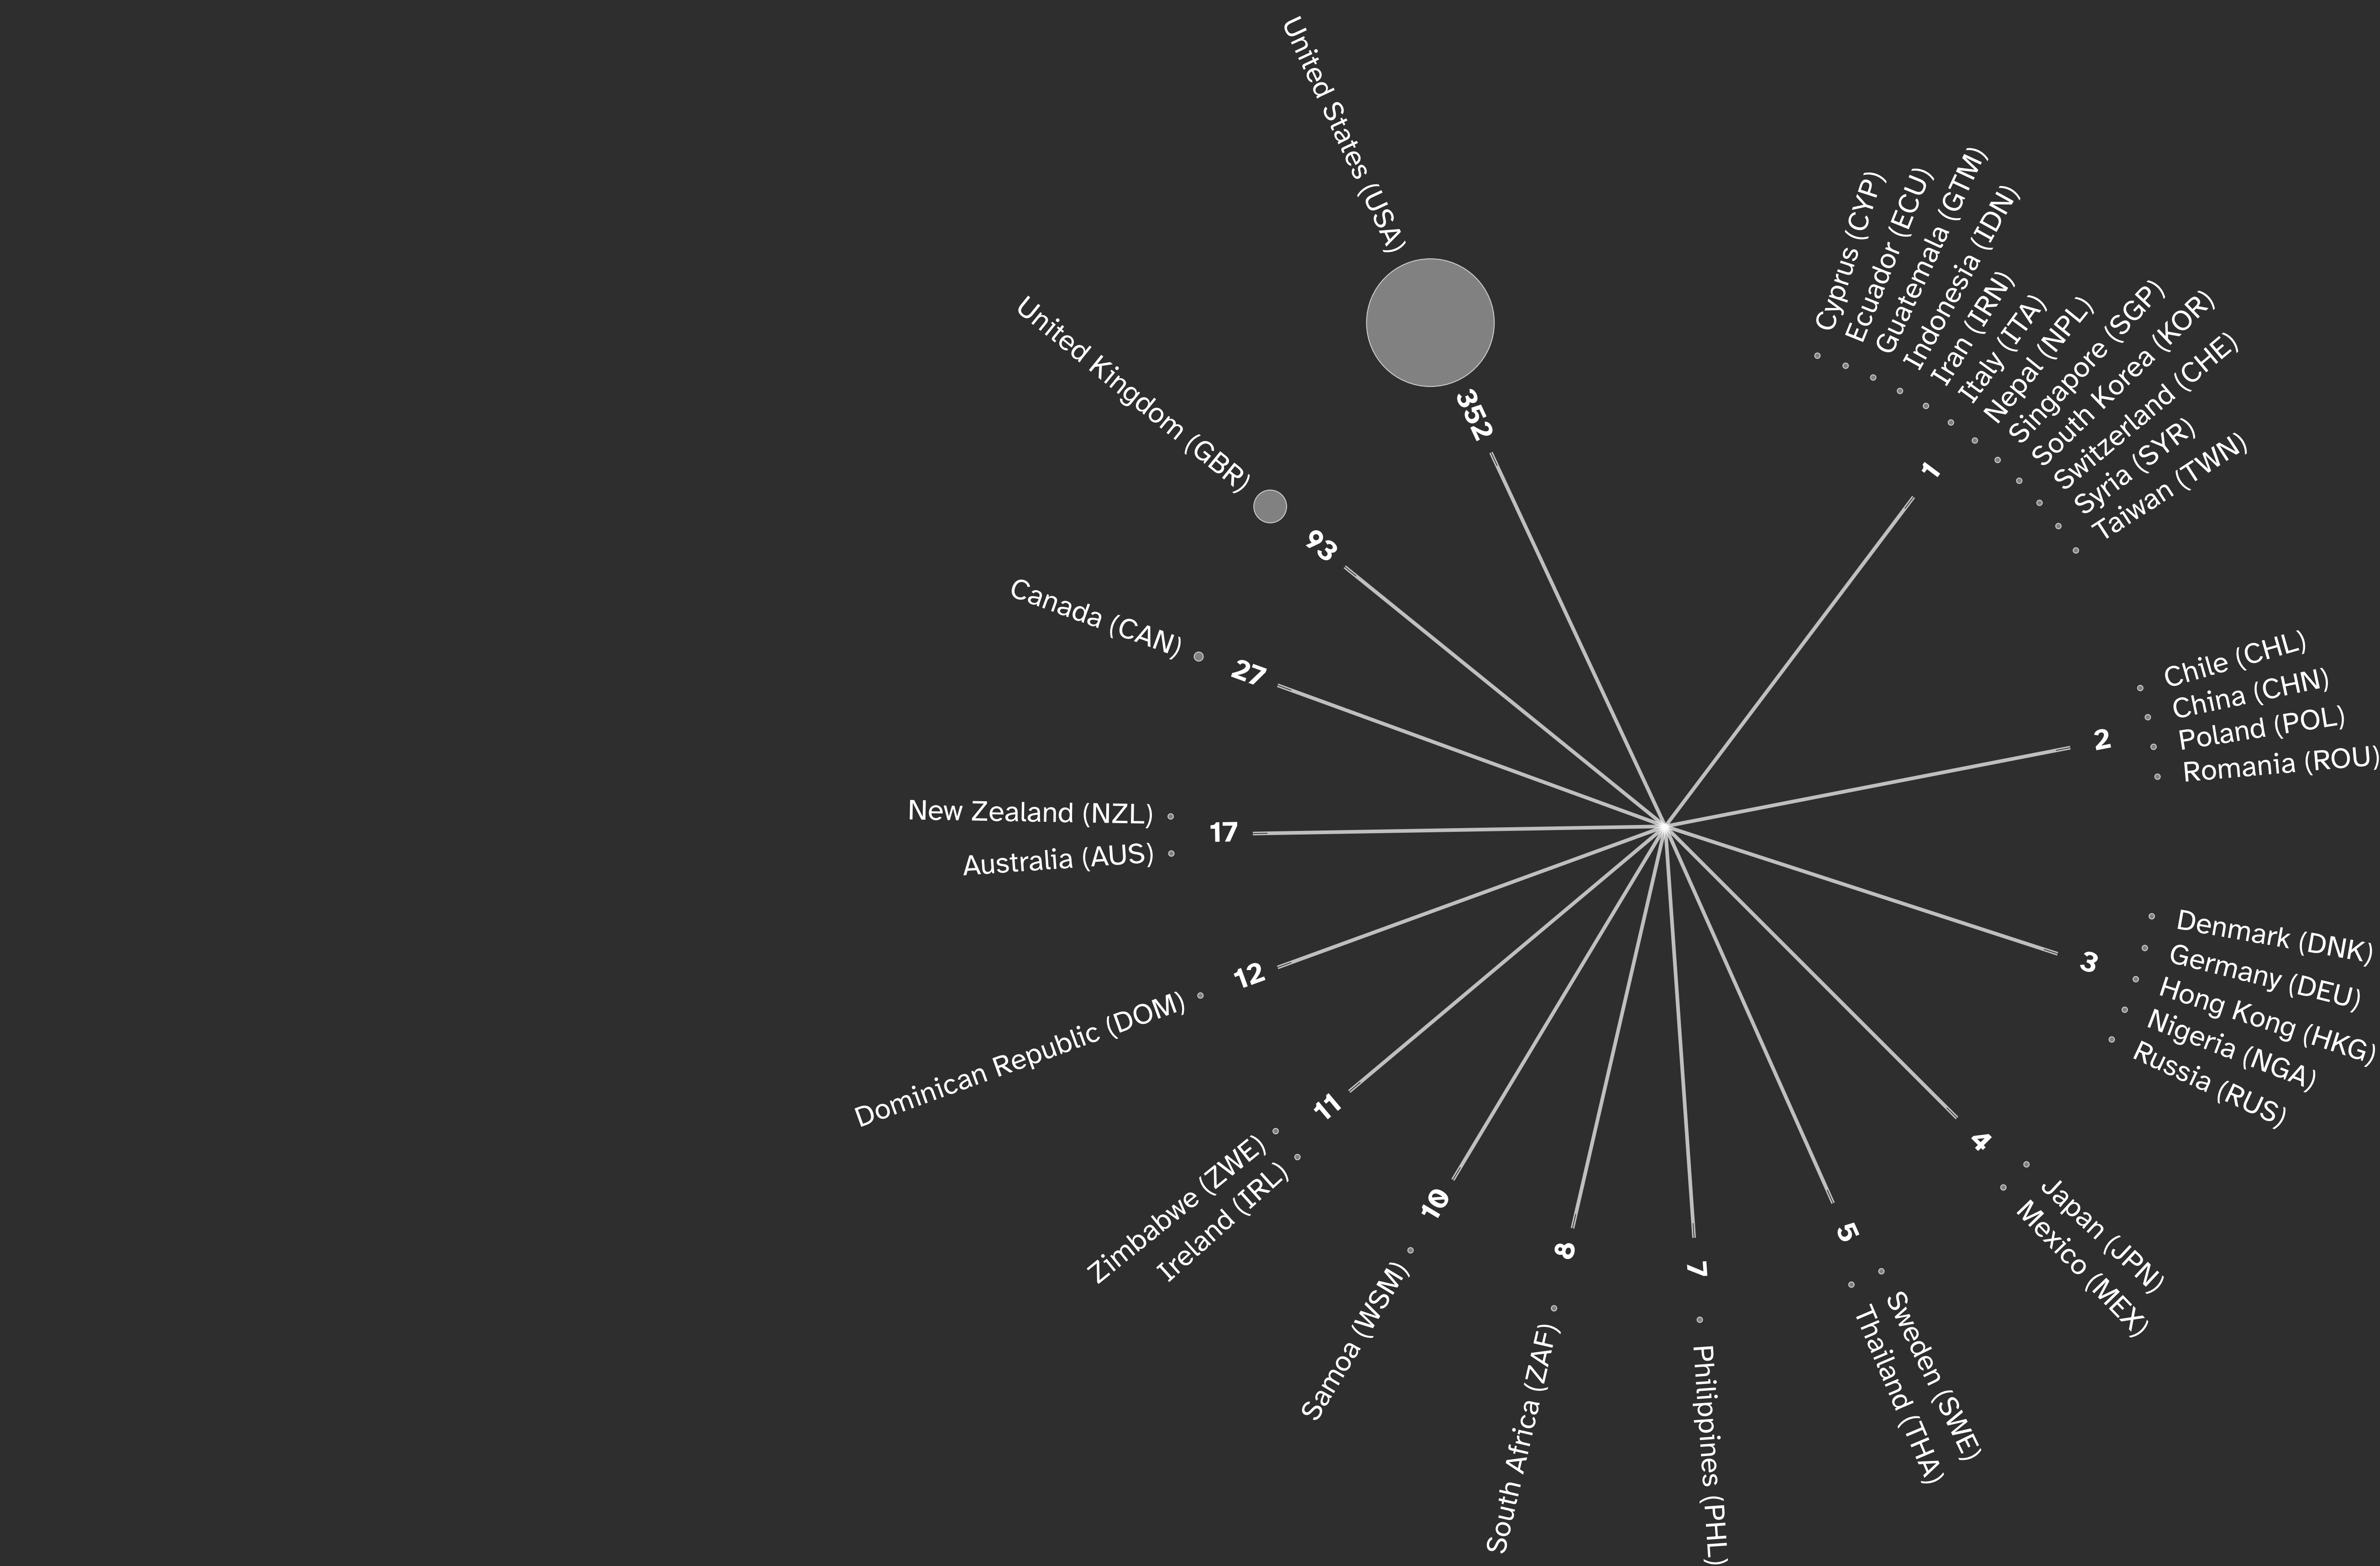

aapi-led / country occurrences

314 confirmed works / 84 with actor country associations / 36 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Only observed country values shown.

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

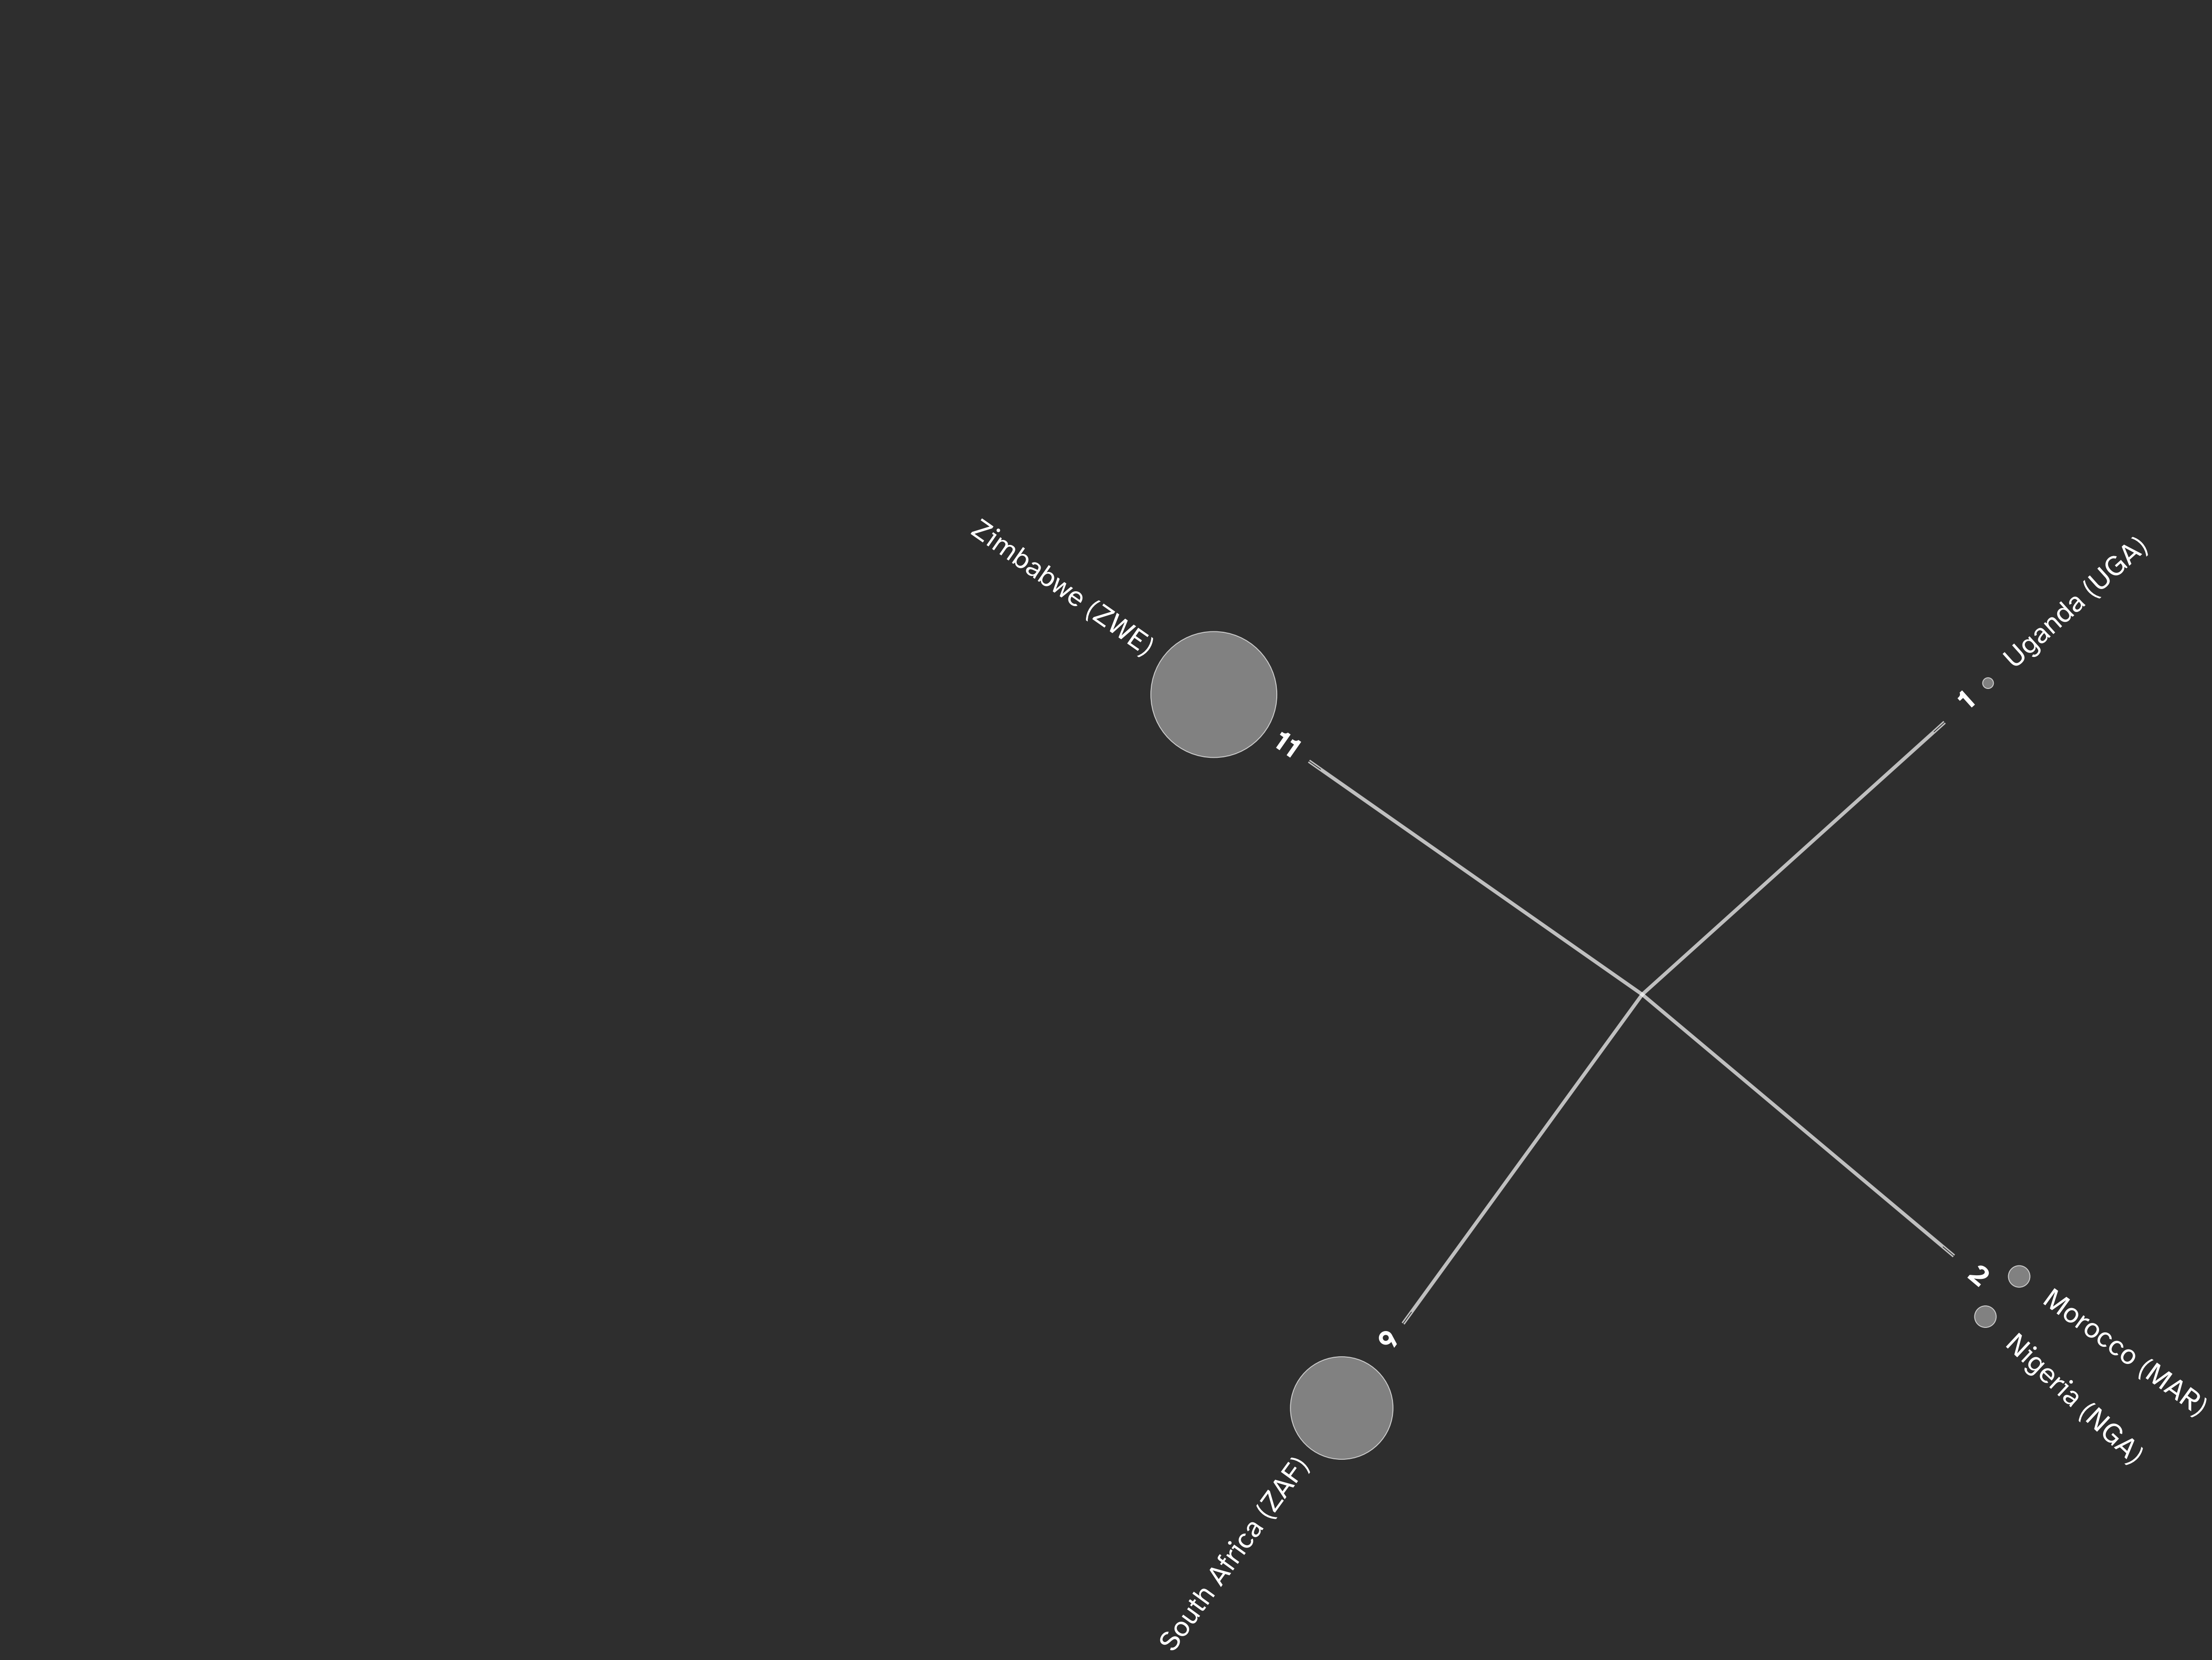

african-led-global / country occurrences

216 confirmed works / 73 with actor country associations / 5 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Zero-occurrence boundary countries omitted.

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

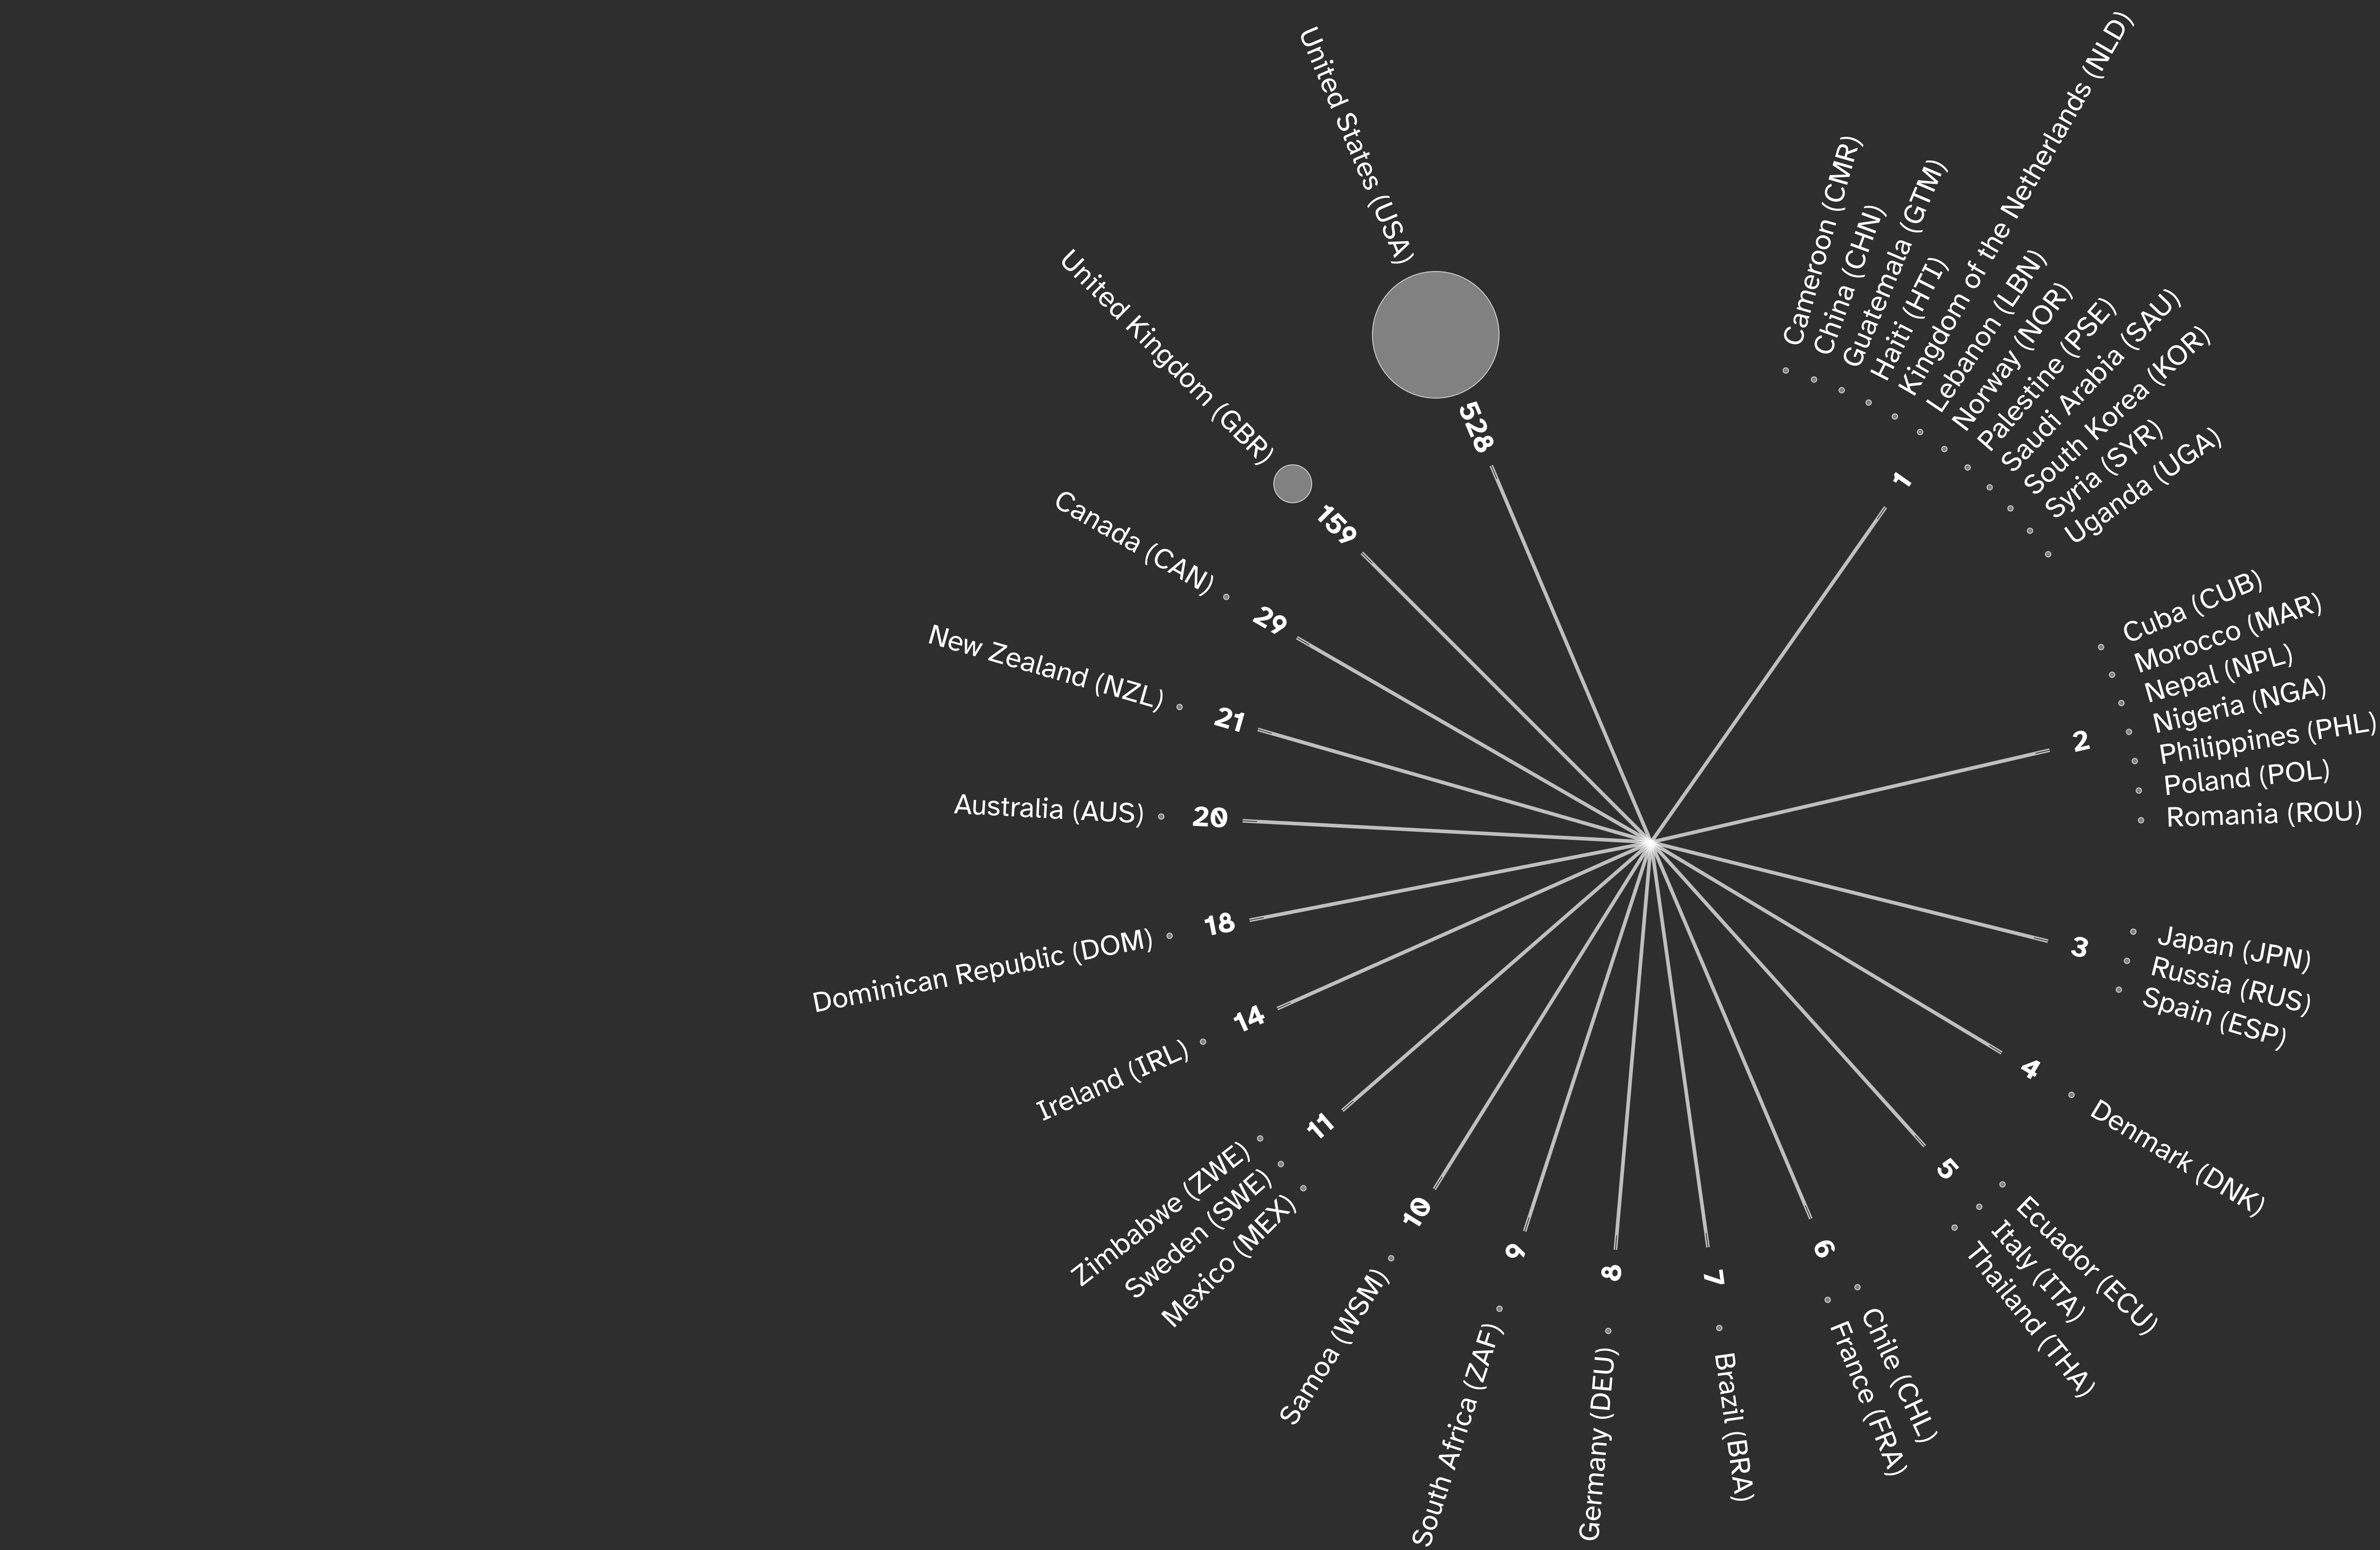

black-led / country occurrences

384 confirmed works / 127 with actor country associations / 42 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Only observed country values shown.

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

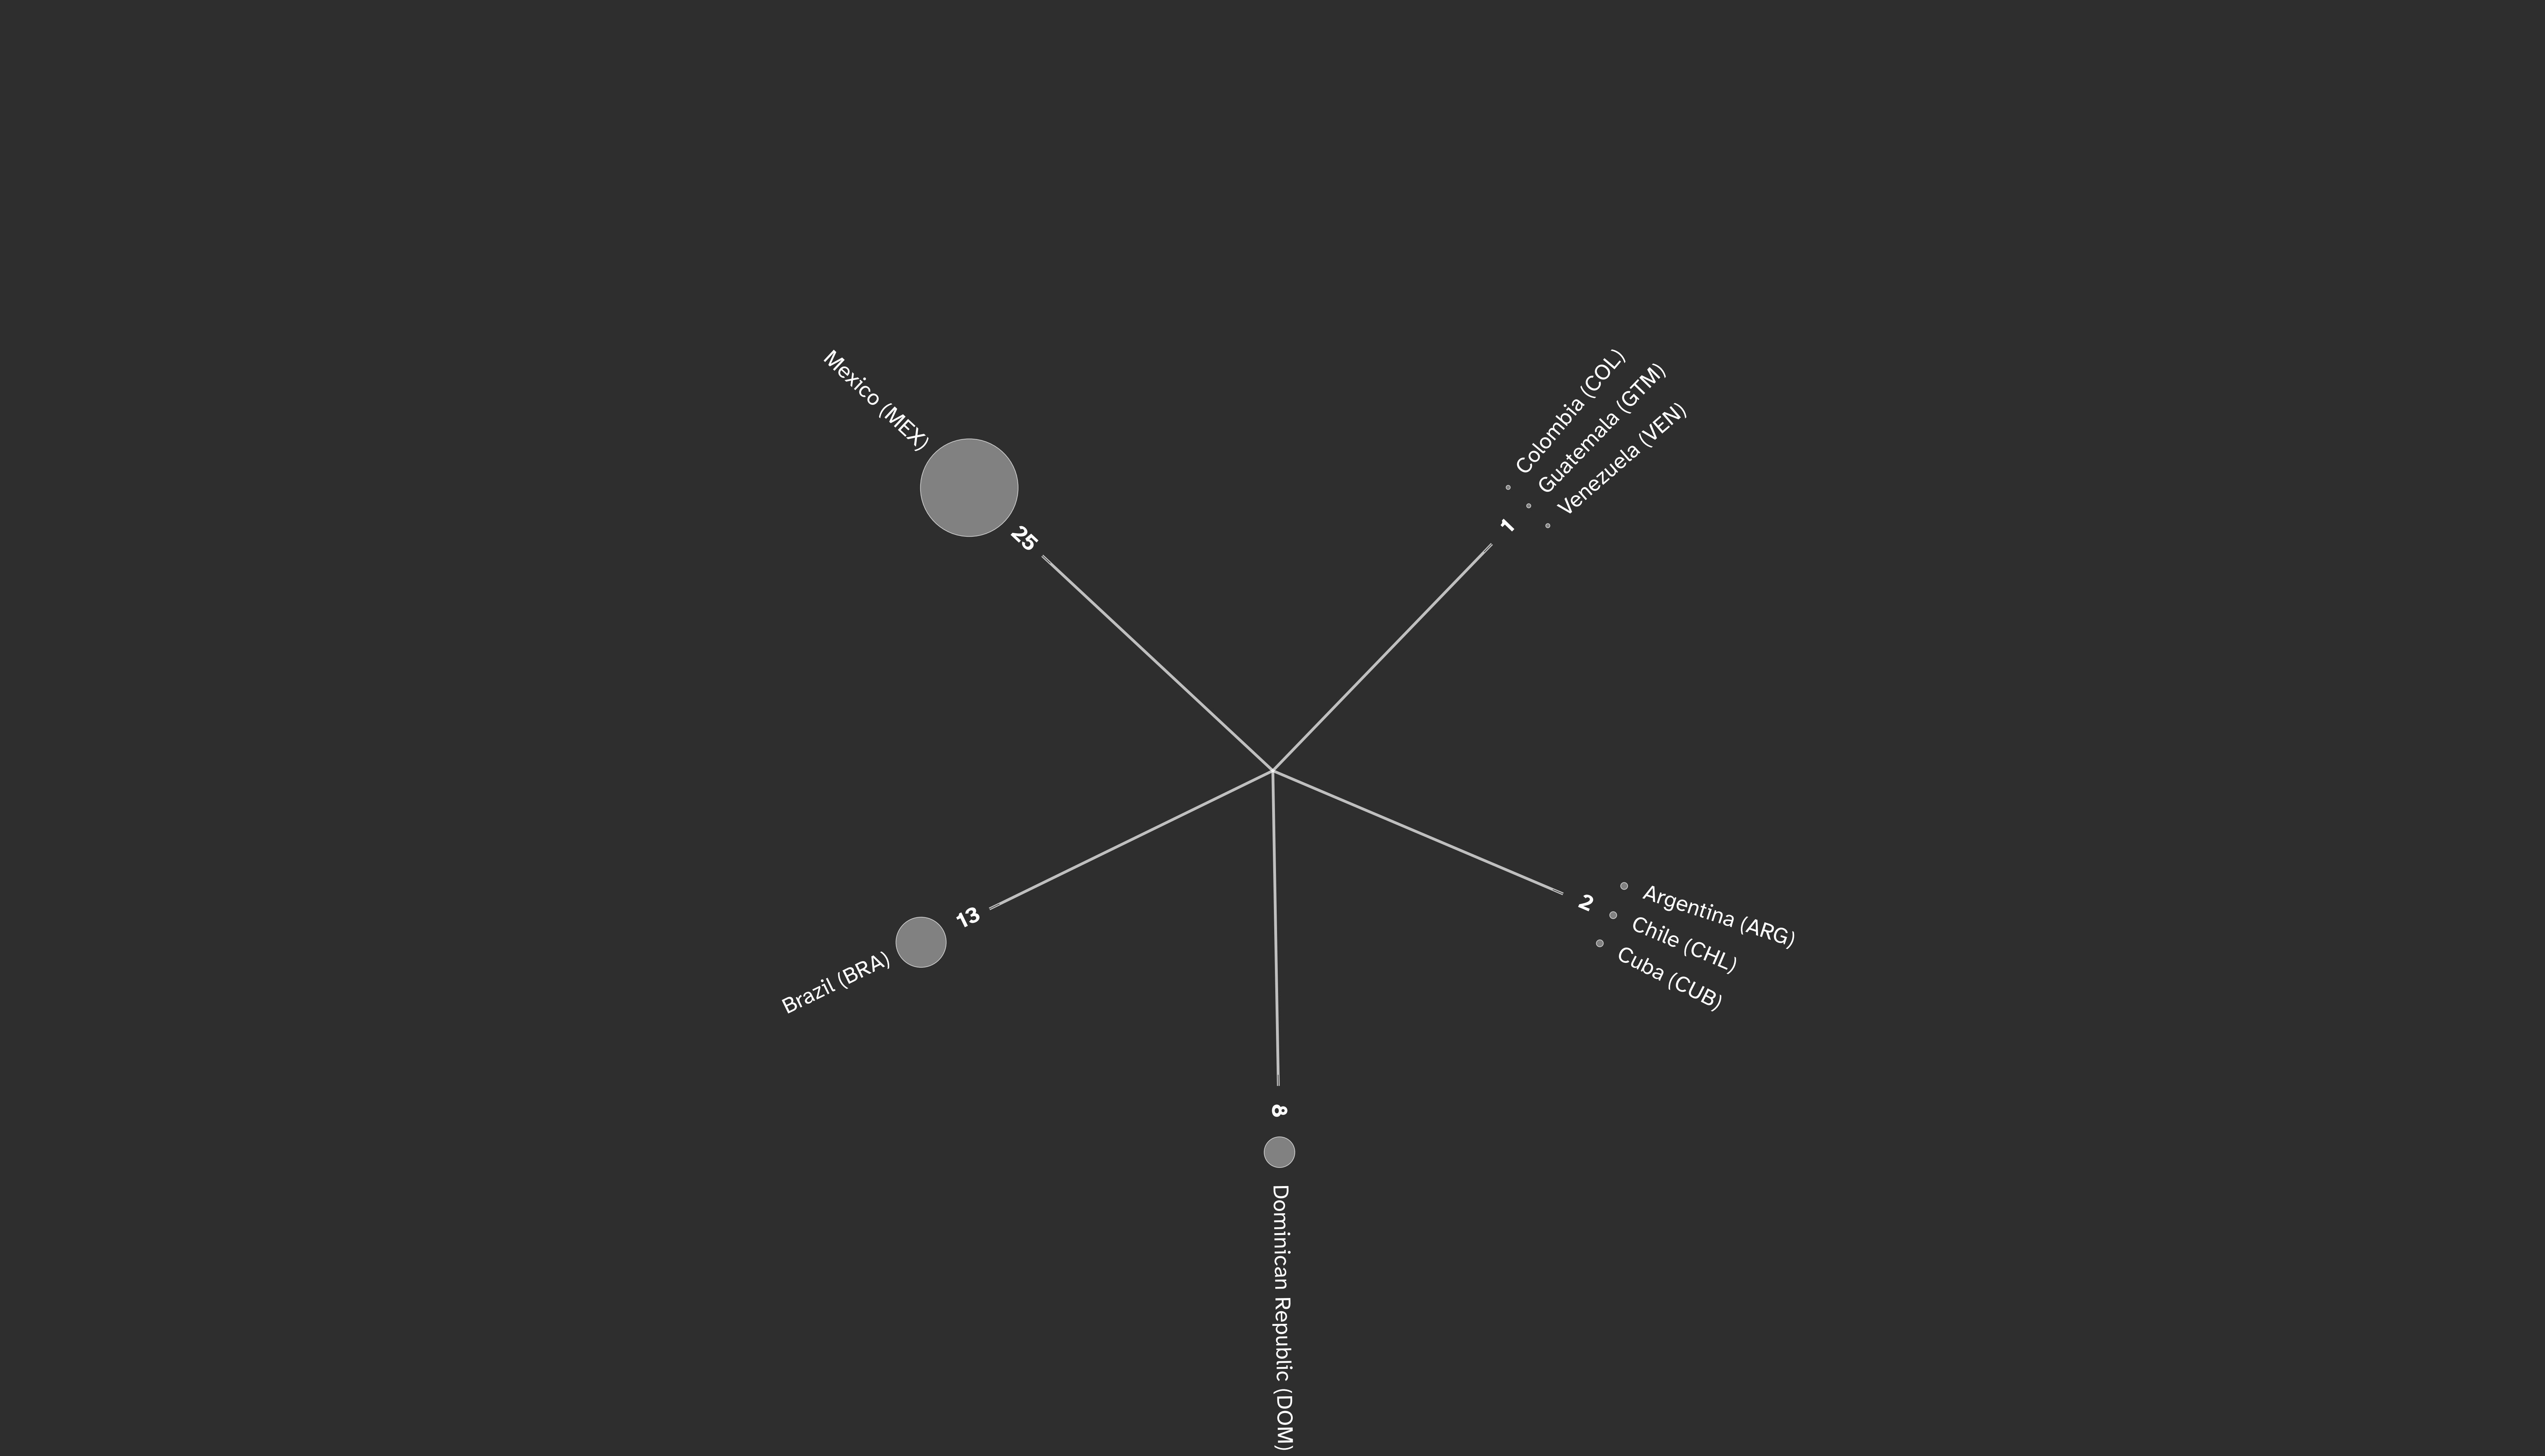

latine-led-global / country occurrences

242 confirmed works / 81 with actor country associations / 9 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Zero-occurrence boundary countries omitted.

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

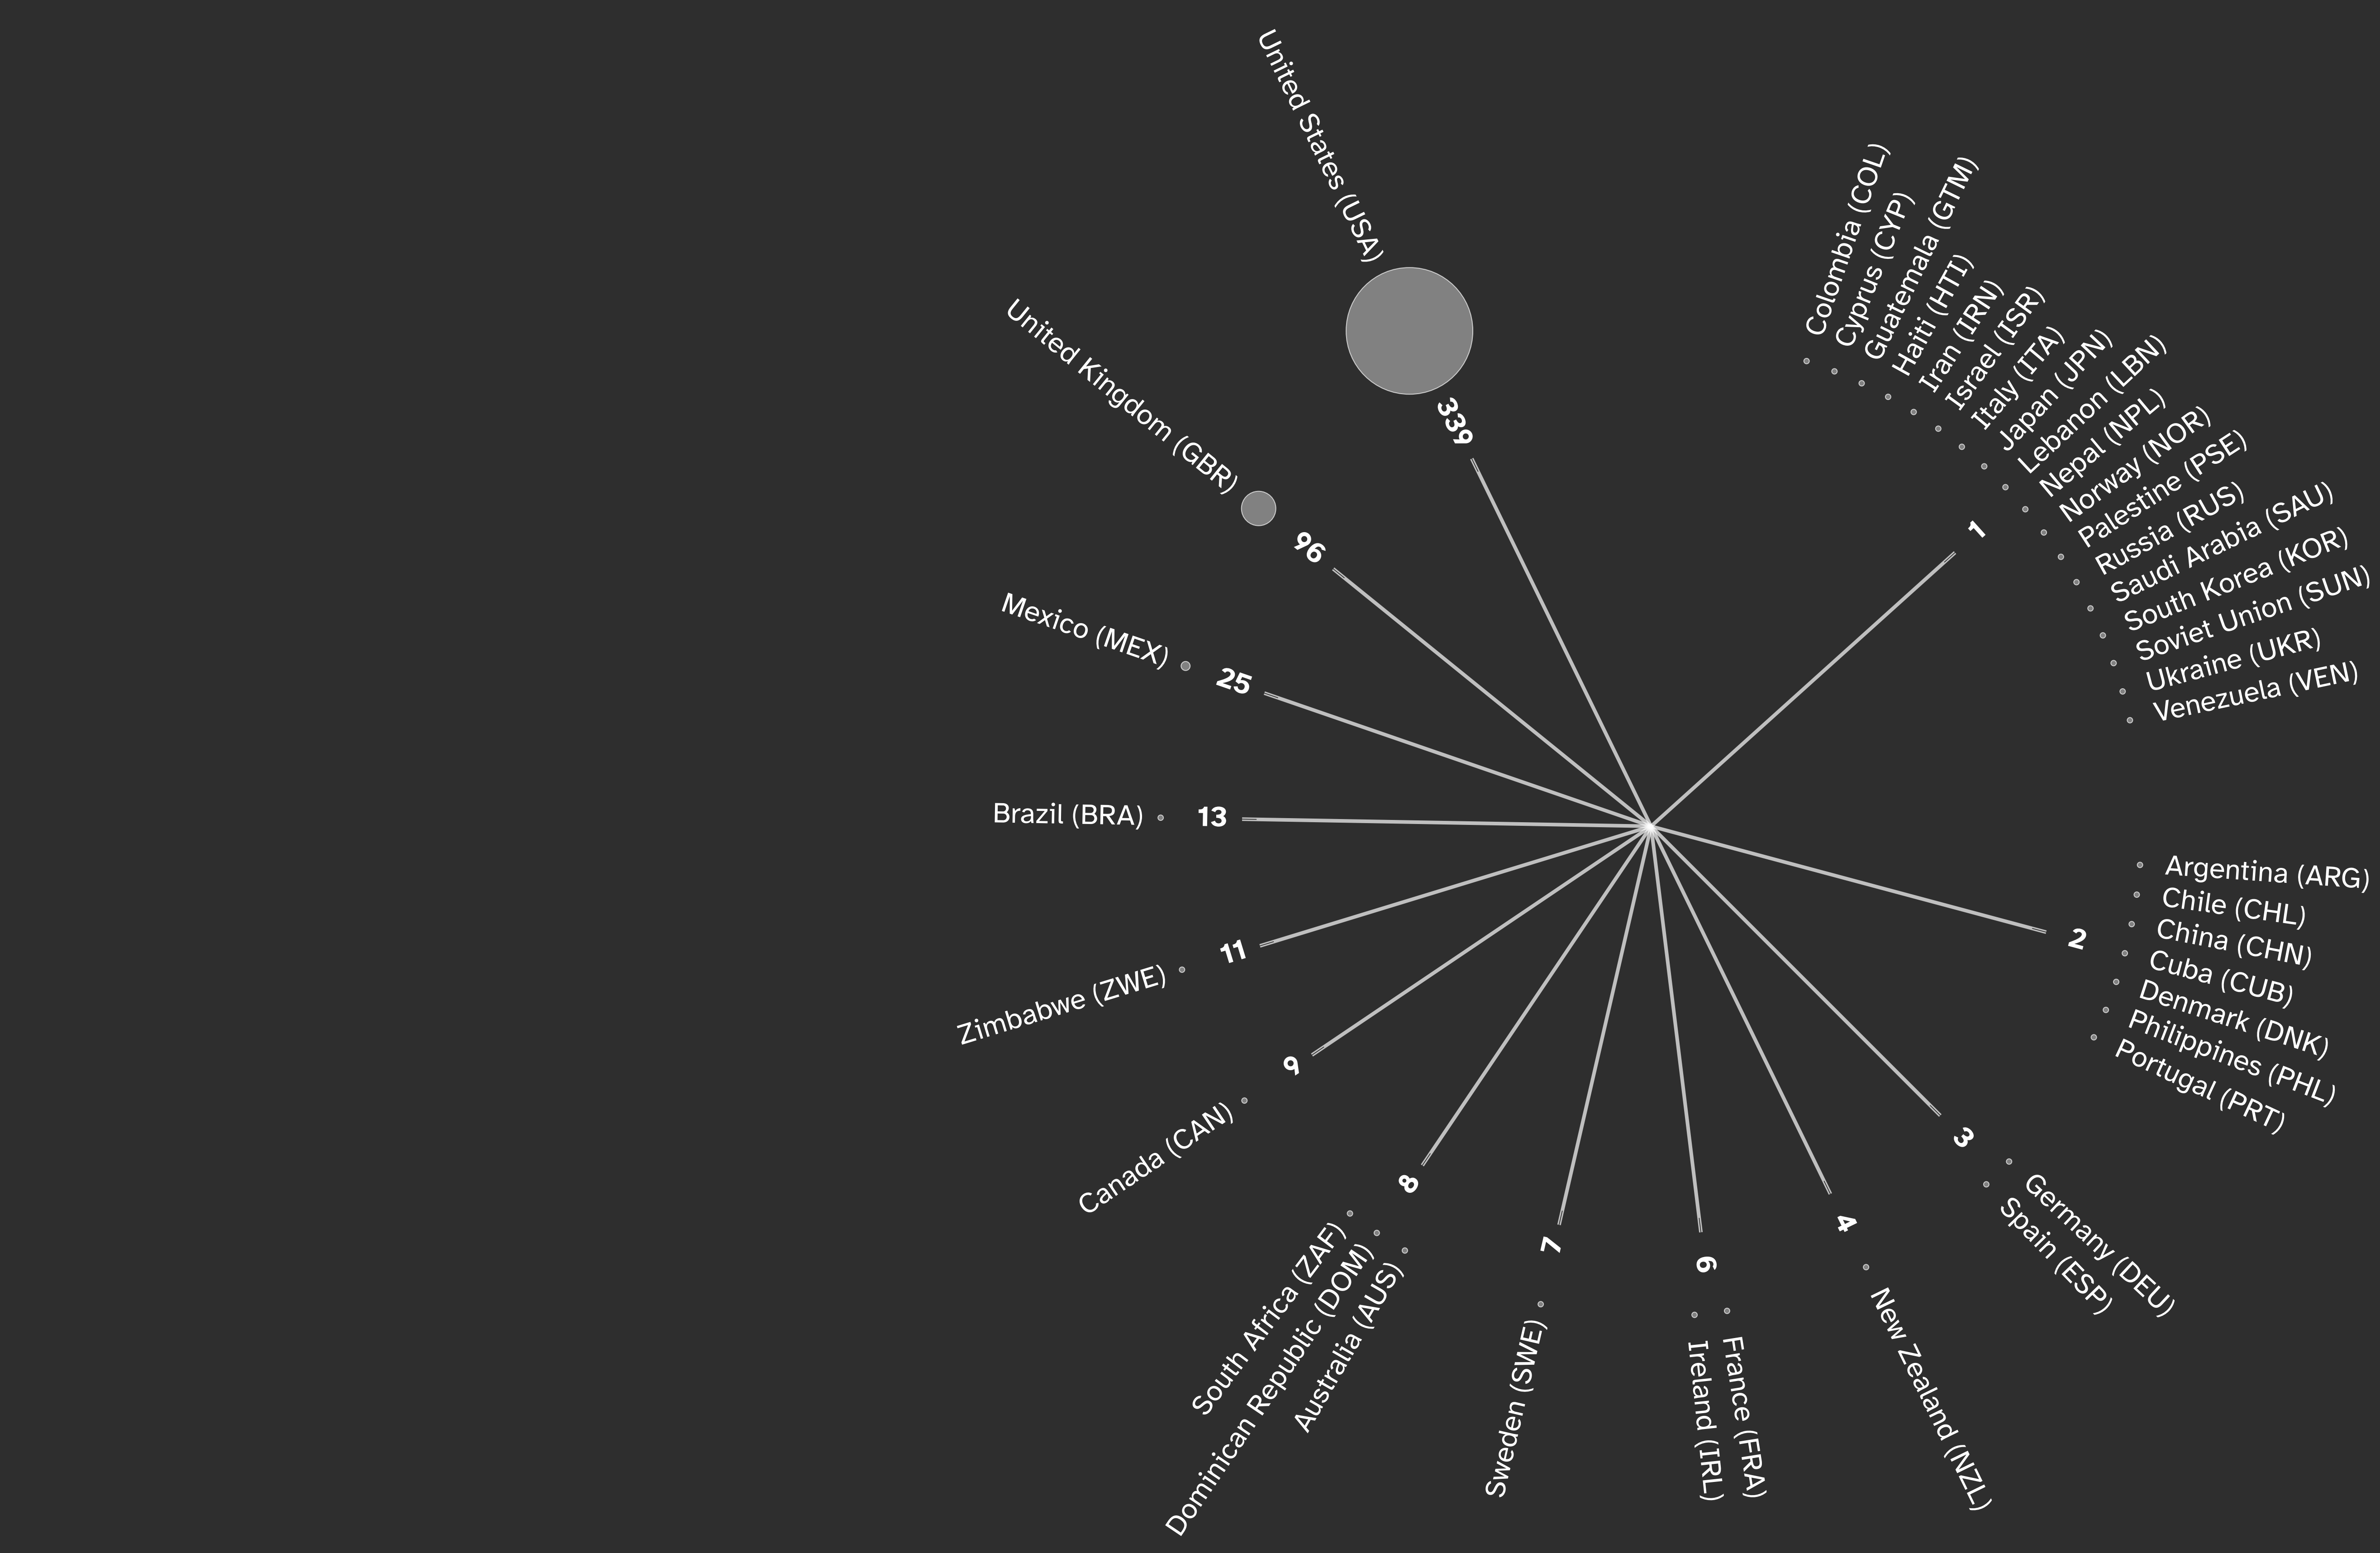

latine-led / country occurrences

255 confirmed works / 81 with actor country associations / 40 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Only observed country values shown.

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

white-led-global / 1-5 occurrences

545 confirmed works / 174 with actor country associations / 41 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Only observed country values shown.

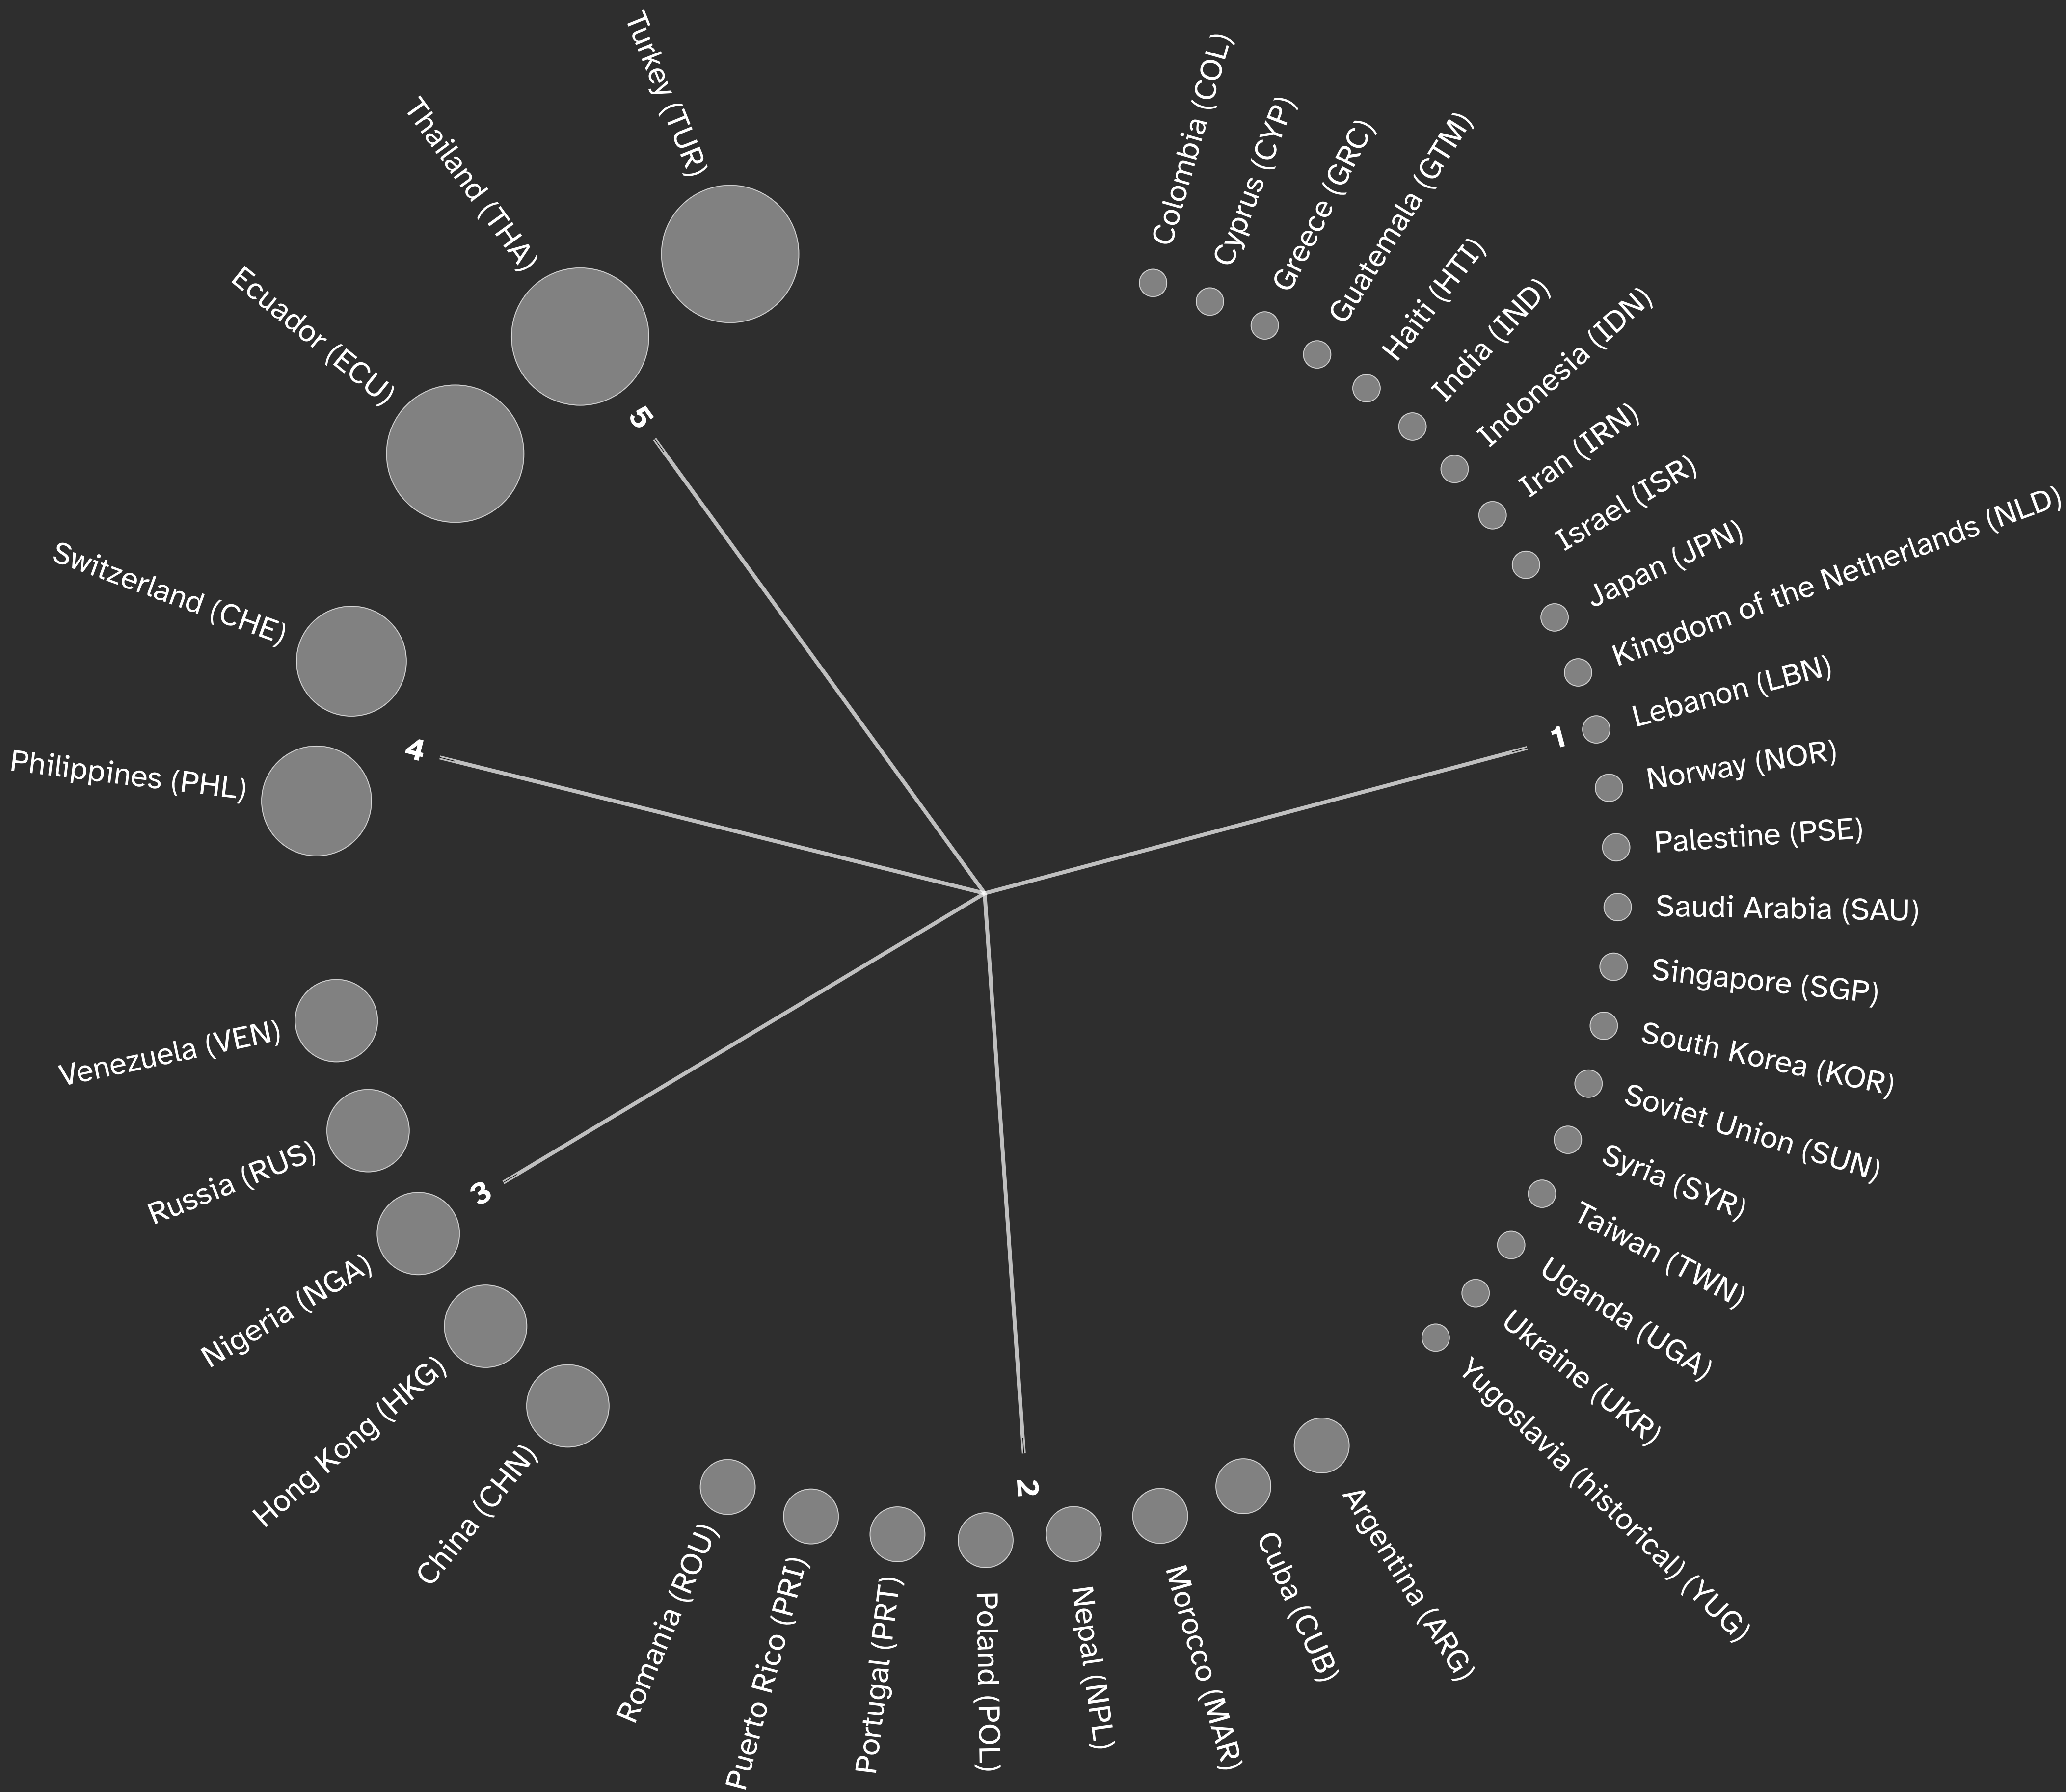

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

One occurrence = one distinct country association per actor cast entry in one sampled media object.

Multiple country associations contribute once to each country; repeat appearances in different media objects contribute again.

This band: 1-5 occurrences per country. Countries sharing a ray have its printed count; each circle and label names a different country.

Association counts combine citizenship, nationality, descent and legacy evidence; they do not assign White/Mixed identity.

white-led-global / 6–20 occurrences

545 confirmed works / 174 with actor country associations / 13 countries shown

Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Only observed country values shown.

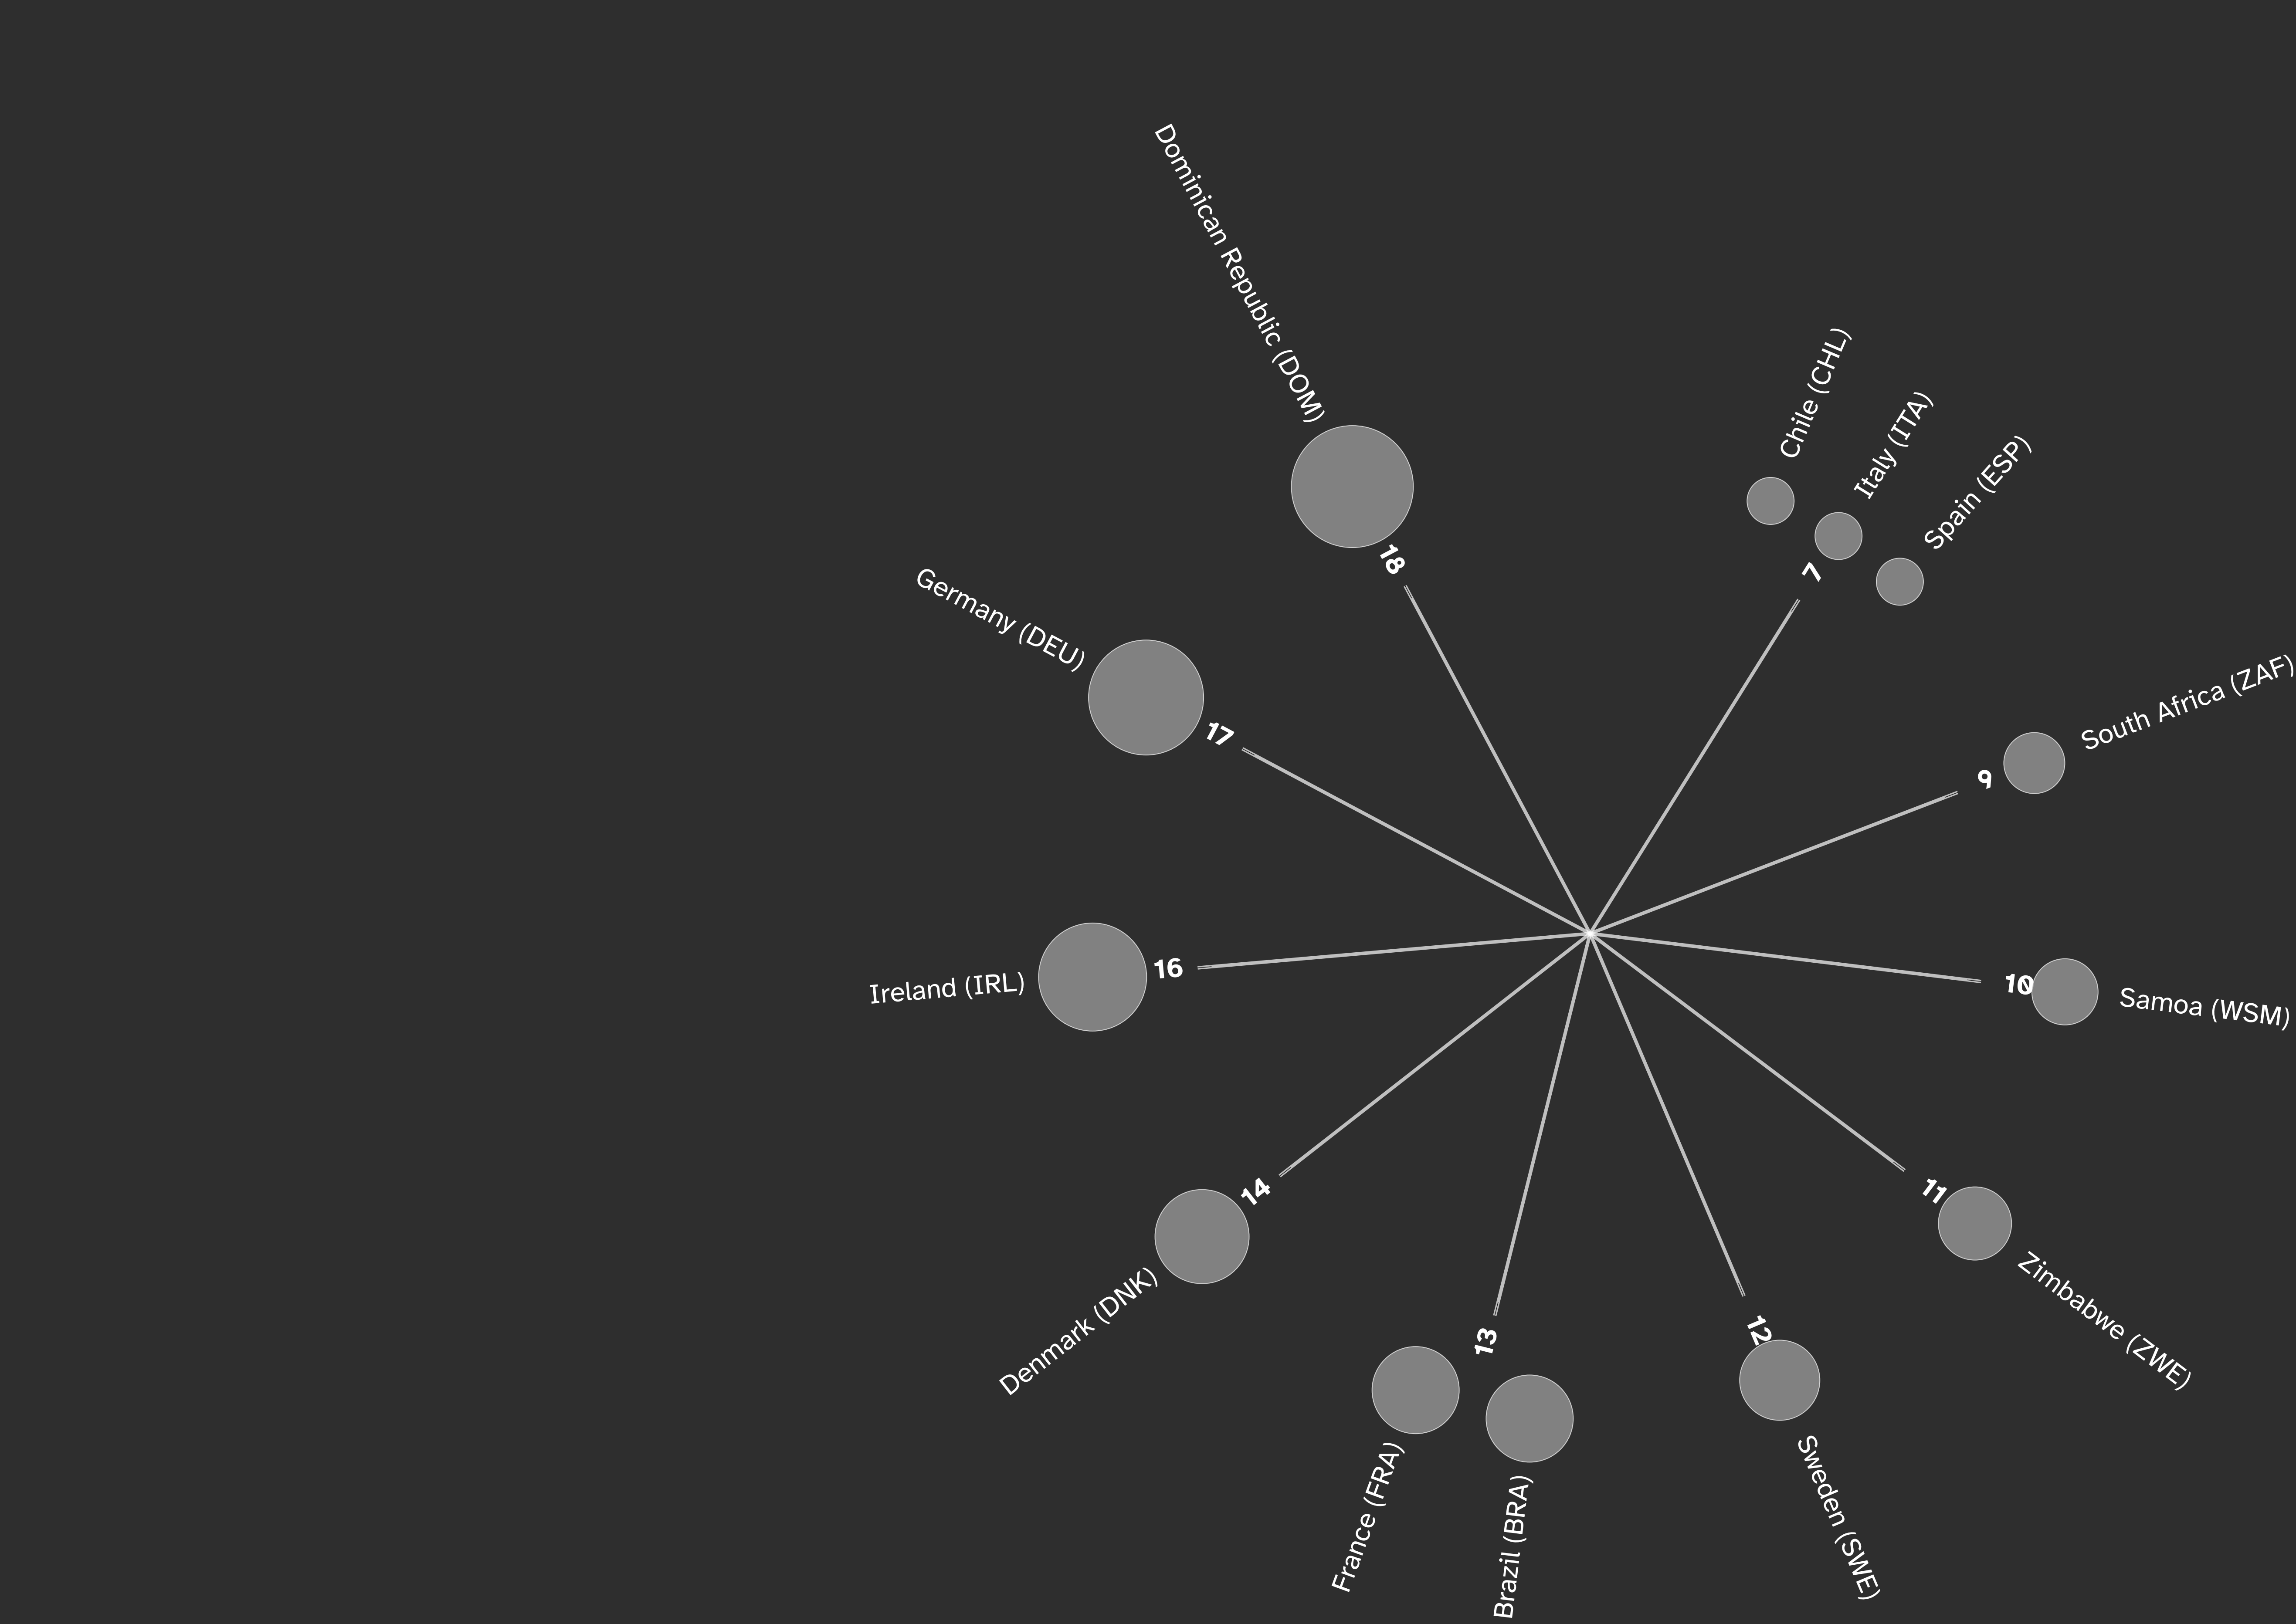

Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

One occurrence = one distinct country association per actor cast entry in one sampled media object.
