mixed-led-global / 21+ occurrences

460 confirmed works / 142 with legacy actor-side nationality annotations / 6 countries shown
Occurrence counts, not unique people. Local scale on each plate; compare printed counts. Only observed country values shown.
Ray angles separate count groups. Radii use a local count scale with a minimum visible marker; compare printed counts.

One occurrence = one recognized country value on the actor side of a legacy cast annotation in one sampled media object.
Two listed nationalities contribute once to each country; repeat appearances in different media objects contribute again.
This band: 21+ occurrences per country. Countries sharing a ray have its printed count; each circle and label names a different country.
Annotation counts are not unique people, White/Mixed identity, citizenship, or production countries. Slice membership is separate.

Canonical artifact SHA-256: b359d89c2060c08b5da6c65495cd529e49bcda69a7791f7ac9ad574ef59ed39b

radial kusama swarm multi countries occurrences 21 plus

declared | Round 2 canonical country occurrences. Slice=mixed-led-global;
